WARRANTY

Duct EZY Ducted Kit Packages

Cooling & Heating

The airCore 700 stands as Hitachi's flagship residential ducted system. It delivers outstanding cooling and heating performance, showcasing a wide capacity range and efficient operation in diverse ambient temperatures, while guaranteeing uncompromised comfort.

Duct EZY are ready designed, premium ducted air conditioning packages. Designing a ducted system is a specialised and technical process. **Duct EZY** removes the need to do so, by providing a pre-designed package, specifically engineered duct kit without compromising optimal performance. Whether for the home, office or shop you can now, at an affordable price, enjoy the luxury of realiable ducted air conditioning.

Key benefits of the Duct EZY system

Four Duct EZY Kits

We offer Duct EZY systems to match all airCore 700 mid-static ducted systems. Duct EZY systems come with two, three or four round supply air diffusers. Depending on your needs this will allow you a range of air conditioning options, small bedrooms or offices will likely require only one diffuser outlet while living rooms and open plan areas may require more.

Quality assured

Duct EZY are high quality air conditioning systems manufactured to the highest standards. You can trust in their absolute reliability, and to prove it Hitachi offers a 6 Year Warranty.

Quiet operation

Duct EZY systems are not only discreet, but also quiet. Both the in-ceiling and outdoor unit have noise levels similar to wall mounted heat pump systems of equivalent capacity. Ducted in-ceiling units are installed in the roof space resulting in a further reduction of noise levels.

Visually discreet

Duct EZY systems allow you the luxury of discreet air conditioning. The ducted unit is installed in the ceiling providing comfort you feel but can't see. Round ceiling diffusers can be discreetly positioned to complement or fit around lighting and existing fixtures.

Affordable costs

Duct EZY systems come already designed and packaged not needing any customisation. This makes them a more affordable alternative to other custom ducted systems.

Hassle free installation

Duct EZY systems have been designed not only to ensure optimum performance but also a hassle free, seamless installation into new or existing buildings. Their retrofit design means there is often no need for any additional post installation repairs to either the inside or outside of your premises.

FrostWash[™] Self-Cleaning Technology

airCore 700 Indoor Units

All airCore 700 ducted units are equipped with FrostWash. FrostWash freezes the dirt and dust trapped in the indoor unit heat exchanger, which is drained away with the condensate when it defrosts - effectively cleaning the heat exchanger and helping to safeguard long-term performance by maintaining good airflow.

FrostWash can be activated manually or automatically at scheduled intervals.

1

Dirty heat exchanger Over time dust and dirt is trapped in the heat exchanger which leads to reduced airflow efficiency.

Melt and drain the dust

Once an adequate layer of frost has been formed, the system then melts the ice, flushing away the trapped dust particles, mould and bacteria hygienically through the drain.

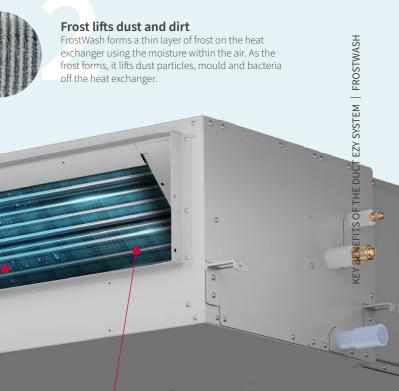

Ņ

Duct

litachi I

Cleaner heat exchanger

The unit thoroughly dries the surfaces inside the unit before resuming normal operation. A clean heat exchanger helps maintain airflow performance and keeps the air in your home cleaner.

Display Adjustment

Function	Action
Backlight Brightness	Adjust the brightness of the backlight
Backlight Dim Time	Dim Backlight after inactivity
Backlight Off Time	Turn Backlight off after inactivity
Screen Theme	Set screen theme as light or dark

*Not available with premium zoning system

**Motion sensor setting requires optional motion sensors installed

Power Consumption Display

Power consumption displays the power consumption of the outdoor unit compressor. The value of each displayed in Graph/List format is 1 day (every 2 hrs.), 1 week (7 days), and 1 year (12 months).

Operation Schedule Setting

Operation schedule function is a 7-day timer used to automatically start or stop the unit operation at the set time. The temperature can also be set. Up to 5 schedules can be set for each day of the week including scheduling for a holiday, six days in advance.

Power Savings Setting

Power Savings setting helps reduce energy consumption with low, medium or high settings available.

Night Quiet Operation

Night Quiet Operation significantly reduces the noise levels of the outdoor unit and offers the feature to schedule Night Quiet Operation for indoor units.

Power Saving/Night Quiet Schedule

Power Saving/Night Quiet Schedule setting starts and stops power savings control and operation noise reduction control at the desired time. Up to 5 Power saving/night quiet schedules can be set for each day of the week.

AutoBoost Setting*

AutoBoost function provides powerful cooling and heating for 30 minutes once the operation starts to rapidly cool or heat your home.

Setback Setting

Setback setting is designed to maintain a minimum level of comfort in a room when it is not occupied reducing unnecessary power usage.

Hitachi Duct EZY

Duct EZY in your home

Relax in style as a concealed Hitachi **airCore** 700 ducted unit quietly and effortlessly fills your home with comfort.

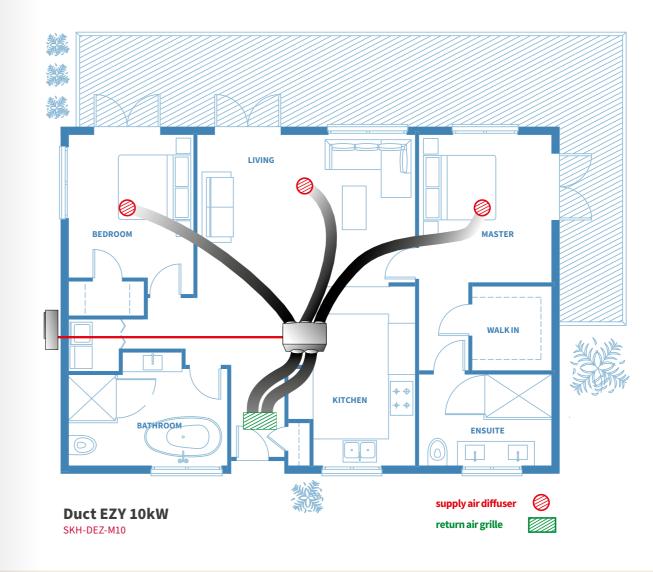

You may be in the process of considering a cooling and heating system in your home. Now with Duct EZY there is a trusted, ready engineered and affordable option for air conditioning not only a single area but your entire home. You'll rest easy with Duct EZY.

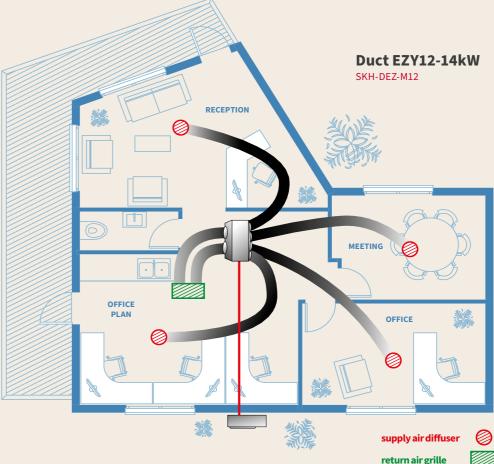

Duct EZY in your business

Duct EZY are professionally designed, premium ducted air conditioning packages.

Duct EZY is a perfect solution for small to medium commercial premises. Shops can benefit from discreet, evenly distributed air supply to open areas. Office buildings with both open areas and small offices require efficient air supply to all these spaces.

In many cases office buildings may require multiple systems due to different heating and cooling requirements within the building. Duct EZY, with its offering for six different sized systems, is a reliable and economical solution.
