How we combine superior performance and energy savings

In a complex world of chilled water technology, Temperzone offer a wide range of solutions.

The sky's the limit with Temperzone water-cooled systems

Temperzone has an extensive range of chilled water products, we have the product to suit your air movement requirements.

All models can be air flow controlled to match the required load profile either through simple local control or through a building management system.

The premium range incorporates EC fan technology, offering a higher efficiency operation compared to traditional AC alternatives.

All Temperzone units incorporate high efficiency heat transfer coils to extract the most out of your chilled water system. Temperzone units have a range of heat transfer coil options adaptable to a wide spectrum of chilled water system operating parameters. Whatever the water temperature and flow rate requirements, Temperzone has a solution to match your needs.

Performance Data**IMDL 130H****Air Handling****Dimensions****Note:**

- Airflows given are for a standard unit with rectangular air spigot and no filter installed.
- Airflows are for dry coil. Reduce airflow by 10% in high moisture removal conditions.
- In a free blow application, beware of exceeding indoor fan motor's full load amp limit.
- Refer to page 51 for filter pressure drop.

Note:

G2/EU2 filters do not meet Australian standards so are not used in the Australian market. G4/EU4 filters, that meet Australian standard, are best located behind return air grilles or in the ducting to reduce the velocity and therefore resistance losses.

Performance Data**Air Handling****Notes:**

- Air flows given are for a unit with no filter installed.
- In a free blown application, beware of exceeding indoor fan motor's full load amp limit.
- Airflows are for dry coil. Reduce airflow by 10% in high moisture removal conditions. Refer to page 51 for filter pressure drop.

Performance Data**Air Handling****Notes:**

- Air flows given are for a unit with no filter installed.
- In a free blown application, beware of exceeding indoor fan motor's full load amp limit.
- Airflows are for dry coil. Reduce airflow by 10% in high moisture removal conditions. Refer to page 51 for filter pressure drop.

Performance Data**Air Handling****Notes:**

- Air flows given are for a unit with no filter installed.
- In a free blown application, beware of exceeding indoor fan motor's full load amp limit.
- Airflows are for dry coil. Reduce airflow by 10% in high moisture removal conditions. Refer to page 51 for filter pressure drop.

Performance Data**Air Handling****Notes:**

1. Air flows given are for a unit with no filter installed.
2. In a free blown application, beware of exceeding indoor fan motor's full load amp limit.
3. Airflows are for dry coil. Reduce airflow by 10% in high moisture removal conditions. Refer to page 51 for filter pressure drop.

- In a free blown application, beware of exceeding indoor fan motor's full load amp limit.
- Airflows are for dry coil. Reduce airflow by 10% in high moisture removal conditions. Refer to page 51 for filter pressure drop.
