Key Features

- Manual FrostWash
- Virosense Filter
- Cascade Vector DC Inverter
- Seamless fan speed control
- Power tracking on optional Wi-Fi
- Dry Mode with Humidity Sensor
- Good Sleep
- Powerful Mode
- Silent Mode
- MY Mode
- Eco Mode
- Leave Home

Purifies your air

ViroSense Z1 filter
Removes many pollutants,
viruses, bacteria from air that
passes through the filter

Not only does airHome
keep you comfy,
but it also improves
your Indoor Air Quality.

Anti-Corrosion Coated Fins
offer an added layer of protection
from damage caused by corrosive
environments.

Anti-Rust paint helps to protect
the outdoor unit from rust and
the unsightly peeling of paint.

FrostWash

Automatically cleans the heat
exchanger, reducing the build up of
grime, bacteria and certain viruses.

- Two identical units were tested for comparison; with and without FrostWash. Test chamber simulated approx. 2 years of dust and oil build up which may be experienced in a typical home environment. Airflow performance was tested before and after FrostWash being in the chamber. Unit without FrostWash experienced an 18% drop in airflow performance. Unit with FrostWash experienced only 6% performance drop. Tested at Johnson Controls-Hitachi Tochigi factory, Japan Nov/Dec 2021.
- Claim refers to the effect of FrostWash technology which showed 99% reduction of virus particles and 99% reduction of bacteria on the heat exchanger tested at Kitasato Research Center of Environmental Science.
- Claim refers to the effect of FrostWash which showed 95.0% reduction of mould on the heat exchanger tested at Kitasato Research Center of Environmental Science

Helps to clean & maintain itself year after year

FrostWash: Better at maintaining peak performance

Over time, dust and dirt builds up
in your AC making it less powerful.
Regularly running Hitachi's patented
FrostWash cycle will remove dust and
dirt build up on the heat exchanger,
ensuring it continues to run at its peak
performance.

FrostWash double benefits:

Preserved performance

Our tests show that systems with FrostWash are
Better at maintaining airflow performance
than those without this technology¹.

Sanitising effects

On the heat exchanger

- 99%**
Viruses
eliminated²
- 99%**
Bacteria
eliminated²
- 95%**
Mould
reduction³

1

Dirt deposits over time on the heat
exchanger which leads to reduced
airflow efficiency.

2

FrostWash:
freeze the heat
exchanger. The frost
captures the dirt.

3

The mould and dirt
detach from the
heat exchanger
as the frost melts.

4

The dirt and mould
are washed away
together with the
condensate.

Bonus Let FrostWash work when you're absent

- The optional airCloud Go app includes the control of
FrostWash, so you can operate it remotely with your
phone.

Wireless comfort

Intuitive and convenient comfort control

- 0.5° Set Temperature
- Manual FrostWash
- 5 Fan Speeds + Auto
- My Mode
- Eco Mode
- Leave Home
- Automatic Mode
- Backlit display
- Timer OFF/ON
- Good Sleep
- Silent Mode
- Powerful Mode
- Up/Down Louvre Control

HITACHI

Eco mode saves energy

Activate Eco mode to switch to more energy-efficient cooling and heating.

Eco mode automatically adjusts the temperature and fan speed to reduce power consumption, saving energy and reducing your running costs.

Program GoodSleep to turn off after a specified number of hours

Set the GoodSleep Timer on the remote, so once activated, the air conditioner will run for your selected number of hours and then automatically turn off.

During the hours of operation, to promote better sleep, it will allow the temperature to gradually increase by 2°C if in cooling mode, or decrease by 2°C if in heating, and operate the fan in a low-noise mode.

Climate Control

Ensures year-round comfort control

Cooler home in summer
Cooling operation
up to +46°C outside.

Warmer home in winter
Heating operation
up to -15°C outside.

Perfect Airflow

Suitable for large rooms, the airHome 400 Distributes air effectively across any room in your house, reaching up to 24m away¹

Powerful Mode

Powerful mode runs your system at maximum cooling or heating, and highest fan speed for 20-minutes to rapidly cool or heat a room

Silent Mode

So quiet, you'll forget it's on!
Thanks to the unique wave blade fan, the air conditioner will run as quiet as 20dB(A)²

Dry Operation

On humid days, Dry Operation dehumidifies the room efficiently and silently

Energy Efficient

airHome's DC power system - including the Cascade Vector DC Inverter - minimises energy consumed during operation.

1. Airflow distance will vary according to fan speed setting, environmental factors and model capacity. Claim refers to models RAK-DJ50PHAT and above with a fan speed of 1200rpm creating an air velocity of 0.15m/s or more according to anemometer tests.
2. The number is observed on airHome400 (2.0~3.5kW model) when the silent mode is set. Tested at Johnson Controls-Hitachi Tochigi factory, Japan.

Effortless comfort with hassle-free controls

Control your AC from anywhere

All airHome air conditioners can connect to our next-generation airCloud Go app via home wifi¹. Check and control your air conditioner's status from wherever you are, whenever you need it. **You will never have to worry if you've left the AC on ever again.**

airCloud Go app

airCloud Go voice control with Alexa and Google Home

Via airCloud Go connect your airHome air conditioner to your smart speaker for hands-free operation³.

Alexa, decrease temperature by 3°C

airCloud Go energy cost estimator

Track AC usage in your home and preview estimates of your daily, weekly, monthly and/or annual expenditure.

You can also set a budget limit and receive notifications as you near this threshold.

A brand-new design remote controller

With a more intuitive controller than ever before, controlling your air conditioner has never been easier.

New 'My Mode' button

The new 'My Mode' button enables you to save up to 3 combinations of your favorite settings (operation mode, set temperature, fan speed) so you can recreate your preferred climate in one touch.

0.5°C temperature control

Set the temperature by 0.5°C increments for more precise comfort.

airCloud Go: automated comfort as you come & go

Link your phone's location to your air conditioner with airCloud Go app's Smart-Fence function. Once you are within a preset distance from your home, your airHome air conditioner will automatically start to heat or cool to your ideal temperature for when you arrive.

As you leave home, you can set your air conditioner to automatically turn off or switch to a more energy-efficient temperature.

More airCloud Go features for better indoor climate control from the convenience of your phone

Turn the air conditioner on/off and set the desired temperature, fan speed and airflow direction

Program your air conditioning operation with the Simple Timer and/or Weekly Timer

Pair your account with unlimited air conditioners

Invite up to 20 users to manage each air conditioner

1. airCloud Go Adapter is available as an optional accessory. Access to a wifi network is required to pair airHome 400 to airCloud Go app.
2. Required router supporting 2.4GHz band.
3. Amazon Echo supports English, French, Italian, Spanish, German. Google Home supports English, French, Italian, Spanish, German, Portuguese-BR, Dutch, Danish, Swedish, Thailand, Chinese(Traditional), Indonesia.

Optional Accessories

Remote On/Off Adapter

Switches the unit on or off via a remote device such as a hotel room card key. Save energy by switching the unit off when the room is unoccupied.

Demand Response Module (DRED)

Optional DRM module for instances where local requirements specify DRED compatibility.

SPX-WKT4 Wired Controller

In addition to essential functions, you will have access to:

- Weekly programming: schedule up to 5 on/off and temperature settings per day
- Ventilation speed
- 'Holiday' function: deactivates the time clock to avoid operation when not required
- Monthly consumption is saved and displayed
- Temperature limiting function
- Operation mode lock
- Error history
- Key lock function: locks all buttons on the remote controller, ideal for homes and offices.
- Multi-lingual support, easy AC operation in your preferred language
- Thermistor selection (indoor, controller, average)
- Room temperature display
- Celsius or Fahrenheit
- On and off timer (once off or everyday)
- FrostWash activation
- Daylight saving time adjustment

Notes: The Rated Capacity, Power Input and Running Current are measured under T1 (cooling) conditions and H1 (heating) conditions in accordance with AS/NZS 3823.1.1

Cooling: Indoor temp: 27°CDB / 19°CWB
Outdoor temp: 35°CDB / 24°CWB

The indoor and outdoor unit sound levels are measured in an anechoic chamber:-
- 1 metre from the air outlet grille
- 0.8 metre beneath indoor height centre

Heating: Indoor temp: 20°CDB / 15°CWB
Outdoor temp: 7°CDB / 6°CWB
