

HITACHI

Advanced (PC-ARFG2-Z) Color Controller

Simplicity with style

Combining the best of form and function, enjoy climate control made easy with Hitachi's most advanced wall controller yet.

Super user-friendly interface

Easy-to-navigate menus

Available in 7 languages

Pictograms and colors for an optimal user experience

Award-winning design

- Minimalist design aesthetic
- Distinctive curves for ergonomics
- Modern and subtle colors

Ideal for

Venues with stylish interior design

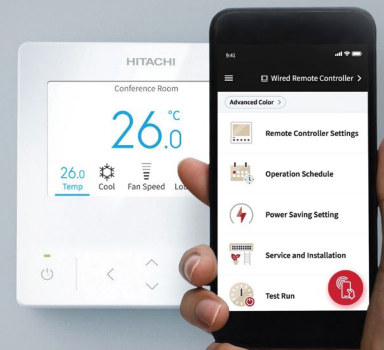

Indoor units with human sensors

Energy-conscious building managers

With Near-field communication (NFC) contactless-enabled system commissioning via the airCloud Tap smartphone app, you can now save, copy, and paste settings to the Advanced Color Controller with a simple tap.

Cooling & Heating

Advanced-Color Controller

From basic to advanced functions

Users can control the main temperature settings from Advanced-Color controller's main screen. In addition, more advanced comfort settings help customizing the air to their occupants' specific needs.

GentleCool limits the temperature of conditioned air, preventing cold drafts for optimal comfort.

AutoBoost automatically activates for 30 minutes every time the AC is turned on, helping the room reach the desired temperature faster.

AC Scheduling is easier than ever, thanks to flexible features such as the holiday calendar.

The latest VRF features

NEW Fan speed at thermo-off reduces air circulation when cooling or heating is not effective.

NEW Activate, schedule and check the history of indoor units' FrostWash™ function.

Individual 4-way cassette louvers optimizes air flow direction to each corner layout.

Schedule Night Quiet mode to minimize the outdoor unit's operation noise so you and your neighbors get a better night's sleep.

Energy optimization

Power-saving features enable VRF system operators to optimise energy usage

Energy consumption visualisation

Capacity – peak cut control

Choice of power-saving method

Power saving setting

Set specific schedules for features like peak capacity cuts and the thermal operation rotation of indoor units, enabling you to match energy-saving operation hours with your utility tariffs plan. Building managers can also set the minimum and maximum temperature range for occupants and visualize energy consumption with daily, weekly or monthly comparison options.

Special features for hotels

NEW Hotel mode enables instant access to the functions demanded most by hotel guests. After guests check out, housekeeping can reset the controller in one touch.

Hotel setback allows interlocking with hotel key cards. When the room is vacant, the indoor unit switches to a selected energy-saving setback temperature, ensuring the room remains at a comfortable temperature when unoccupied.

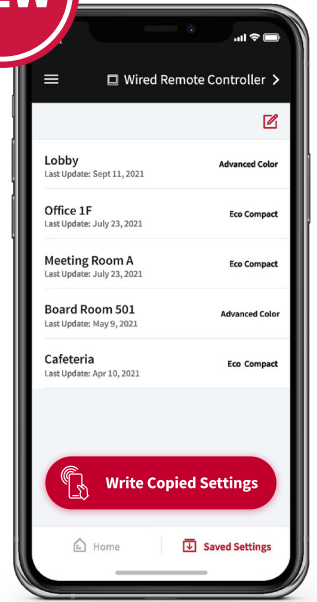

Ideal for indoor units with motion sensor features

NEW

Active intelligent comfort features connected to your indoor unit's motion sensor and/or radiant sensor*: choice of direct/indirect air flow, FeetWarm **NEW**, FloorSense Cool **NEW** and the exclusive Crowd-Sense **NEW** to prevent heat peak from rapid crowd arrival.

airCloud Tap: Use your phone to set the controller!

The Advanced Color Controller is NFC-enabled, simplifying the setup and maintenance via the airCloud Tap app. The app offers illustrations, visual guides and descriptions, saving you time and making the process easier than ever.

App highlights

Installation & commissioning

Room address

Room address
Use your mobile phone's keypad to quickly type in each room name.

Date/Time setting
Import time and date settings from your mobile phone directly into the Advanced Color Controller.

airCloud Tap time-saving tip

Save your setting preferences inside the app to quickly apply them again later. A simple tap is all it takes to copy, paste and apply your saved settings. This is particularly useful for multiple zones with similar needs, e.g. hotel guestrooms, office meeting rooms, condominium units, etc. Users can specify all the settings for one zone, save them, then apply these settings to other zones in one tap.

Simple 4-step 'Read & Write' process

Operation

Function selection

Function selection
Browse over 140 features and edit settings quickly via the app.

Scheduling
View weekly schedules clearly and make quick adjustments easily.

1 Activate the NFC function on the controller.

2 Open the airCloud Tap app and tap the controller with your phone to create a connection.

Maintenance & service

Error & history

Troubleshooting
Complete service check data is displayed including connected indoor and outdoor units, refrigeration cycle information, sensor data, and more.

Error alarm & history
Error alarm codes and their descriptions are displayed on the app; error histories can be forwarded to support the servicing of controllers.

3 Edit the desired settings on your phone. You don't need to be close to the controller while editing.

4 Tap the controller with your phone to write the new settings and apply them to the controller.

*In selected countries from Dec-2021

*In selected countries from Jan-2022

airCloud Tap is available for free in Google Store and IOS appstore. Quick sign up with minimal personal information.

Specifications

- 1 Room name
- 2 Set temperature
- 3 Set temperature setpoint
- 4 Operation mode
- 5 Indoor unit ON/OFF light
- 6 Indoor unit ON/OFF
- 7 Navigation buttons
- 8 Back button
- 9 OK button
- 10 Fan speed
- 11 Louver direction
- 12 Access to menu
- 13 Filter cleaning reminder

Advanced Color wired remote controller	PC-ARFG2-Z
Power Supply	Powered by indoor unit, 15VDC±10%
Dimensions	W 120mm × H 120mm* × D 16.5mm(thinnest part) W 120mm × H 120mm* × D 21.5mm(thickest part)
Weight	180g (approx.)
Installation	Indoor, on the wall or switch box
Connection capacity	Up to 16 indoor units (with the same wired remote controller)
▲DisplayBrightness	When two wired Advanced Controller units are connected to the same indoor unit, the maximum brightness of each controller will be halved

* H is the height of the unit from the front, without the protrusion at the bottom.

Example of System Configuration

Possibility of 2 Wired Controller Connection

Up to 16 IDU Connection
