

# EMPLOYMENT OPPORTUNITY

## Design Engineer

Temperzone is a leading manufacturer, distributor of innovative air conditioning and ventilation products throughout Australasia, Southeast Asia, and China. We are also the exclusive distributor of Hitachi Cooling & Heating products within Australia and New Zealand. We have evolved through an ongoing commitment to best manufacturing practices, innovative design, customer service, and technology for quality delivery.

### About the role

It is an exciting time to join us. Our engineering department is on their transforming journey to change the way we develop and build air-conditioning solutions. This is your opportunity to be part of this change.

Reporting to the Engineering Manager, this role is responsible for developing new industry leading products from concept through to production. You will have the opportunity to lead and coordinate projects through our gateway methodology and product development process. The role also has close connections with the R&D, and Compliance and Test teams to ensure the performance and compliance of products. You will have the opportunity to represent your project at PSG, take the lead to present project status and risk when necessary.

### What you will bring to the role

We are looking for an experienced design engineer with Strong CAD and simulation software skills. Advanced CAD skills, would be highly appreciated, we prefer Inventor experience. You should also have knowledge of BOM systems and MRP.

You should be able to deal with some ambiguity and be able to distil market requirements from the project design Brief into a clear set of design requirements with specification limits and tasks and a plan. This role will also see you strive to achieve a high level of efficiency in your design work always

Our ideal candidates are someone with experience in product design for manufacturing, preferably in the refrigeration or HVAC industry. We are looking for a strong communicator with solid project management skills. You should also be a self-starter that consistently displays a can-do attitude. A hands-on problem-solving approach is highly appreciated.

### What we can offer

We are a close-knit team which offers a supportive environment, free on-site parking, an on-site café and well as opportunities for development.

At Temperzone we believe that our people are our strength so it's important to us to have the right people in the right roles to move us into the future.
