Every Project

How We Combine Superior Performance And Energy Savings

In a complex world of chilled water technology, Temperzone offer a wide range of solutions.

The sky's the limit with Temperzone water-cooled systems

Temperzone has an extensive range of chilled water products, we have the product to suit your air movement requirements.

All models can be air flow controlled to match the required load profile either through simple local control or through a building management system.

The premium range incorporates EC fan technology, offering a higher efficiency operation compared to traditional AC alternatives.

All Temperzone units incorporate high efficiency heat transfer coils to extract the most out of your chilled water system. Temperzone units have a range of heat transfer coil options adaptable to a wide spectrum of chilled water system operating parameters. Whatever the water temperature and flow rate requirements, Temperzone has a solution to match your needs.

*4 Nominal cooling capacity based on 6 row high speed at 27/19 entering air and 7 degree entering water temperature. 4 row cooling coil has approximately 85% cooling capacity and 70% water pressure drop at same temperatures and flow rates.

*5 Nominal heating capacity based on 1 row on high speed at 21 entering air and 60 degree entering water temperature.
